RUSSIAN ACADEMY OF SCIENCES. IZVESTIYA. MATHEMATICS

Том 58, №№ 4–6, 1994

Volume 45, Numbers 1–3 Pages 1–638

## Volume Index of Authors

**Arkhipova, A. A.** On the regularity of the solution of the Neumann problem for quasilinear parabolic systems ..... 231

**Arutyunov, A. V.** On the theory of degenerate quadratic forms in the classical calculus of variations ..... 433

**Baranovskiĭ, V. Yu.** The cohomology ring of the moduli space of stable bundles with an odd determinant ..... 207

**Baskakov, A. G.** Spectral analysis of perturbed nonquasianalytic and spectral operators ..... 1

**Gaĭsin, A. M.** Behavior of the logarithm of the modulus of the sum of a Dirichlet series converging in a half-plane ..... 175

**Gritsenko, S. A.** An approximate functional equation for a product of two Dirichlet $L$-functions ..... 255

**Ĭotov, M. Ts. [M. C. Jotov]** Nadel sheaves and properties of vector bundles on Fano varieties ..... 281

**Kac, V. G.** Corrections to the paper of B. Yu. Veĭsfeĭler and V. G. Kac "Exponentials in Lie algebras of characteristic $p$" ..... 229

**Khabibullin, B. N.** Nonconstructive proofs of the Beurling-Malliavin theorem on the radius of completeness, and nonuniqueness theorems for entire functions ..... 125

**Kochubeĭ, A. N.** Gaussian integrals and spectral theory over a local field ..... 495

**Kudryavtsev, S. N.** Recovering a function with its derivatives from function values at a given number of points ..... 505

**Kulikov, Vik. S.** A geometric realization of $C$-groups ..... 197

**Osipenko, K. Yu.** On $n$-widths, optimal quadrature formulas, and optimal recovery of functions analytic in a strip ..... 55

**Pidstrigach, V. Ya.** Patching formulas for spin polynomials, and a proof of the Van de Ven conjecture ..... 529

**Radionov, D. Yu.** On the Torelli and Schottky problems for Prym varieties ... 297

**Salerno, S. and Vitolo, A.** On the distribution in arithmetic progressions of reducible quadratic polynomials ..... 215

**Sazonov, L. I.** Justification of the linearization method in the flow problem .. 315

**Sedletskiĭ, A. M.** Nonharmonic Fourier series without the Riemann-Lebesgue property ..... 545

**Shevaldin, V. T.** Lower estimates of the widths of classes of functions defined by a modulus of continuity ..... 399
**Shevchenko, Yu. A.** On boundary behavior of typical mappings ..... 623
**Shevchenko, S. N.** Quadrics of codimension two, and their automorphisms .. 151
**Shkarin, S. A.** On a class of continuous nowhere differentiable functions .... 423
**Skalyga, V. I.** On deformations of nonsmooth optimization problems having an isolated extremal ..... 187
**Smirnov, V. A.** Homology of $B$-constructions and co-$B$-constructions ..... 79
**Timashev, D. A.** Generalization of the Bruhat decomposition ..... 339
**Trofimov, V. I.** Graphs with projective suborbits. Cases of small characteristics. I ..... 353
———, Graphs with projective suborbits. Cases of small characteristics. II... 559
**Troitskaya, S. D.** On non-almost-periodicity of solutions of the Sobolev problem in domains with edges ..... 97
**Tyurin, A. N.** Canonical spin polynomials of an algebraic surface. I ..... 577
**Vitolo, A.** See Salerno, S.
**Voronin, S. M.** On quadrature formulas ..... 417
**Zakharov, V. K.** The Kaplan extension of the ring and Banach algebra of continuous functions as a divisible hull ..... 477
**Zhiber, A. V.** Quasilinear hyperbolic equations with an infinite-dimensional symmetry algebra ..... 33
